| ABOUT FLORI

A 2022-built Sanlorenzo SD96, Flori is the creation of designers Zuccon International Project and Studio Patricia Urquiola, completely balanced in every aspect and exhibiting breathtaking craftsmanship combined with contemporary design. This 29.6-meter motor yacht accommodates up to 8 guests across 4 en-suite cabins, with the full-beam Master suite positioned on the main deck featuring a private terrace for exclusive relaxation. The VIP cabin, along with two additional double cabins, ensures flexible accommodation options for groups of varying sizes, while the well-considered layout maintains privacy and comfort throughout the vessel.

The sky lounge stands as the yacht's crown jewel for entertaining and unwinding. The ceiling-to-floor glass balcony door on the portside completely slides to the side, opening the space to panoramic views, while the aft balcony doors fold back entirely to create an expansive indoor-outdoor living area. This seamless transition between interior and exterior spaces defines modern luxury cruising, transforming the lounge into an extension of the Mediterranean itself.

Premium materials and sophisticated interior solutions throughout the yacht reflect Urquiola's refined aesthetic vision. The main saloon provides comfortable seating and comprehensive entertainment options, serving as the social heart of the vessel. Every detail, from cabinetry to soft furnishings, demonstrates meticulous attention to quality and design coherence.

For active guests, Flori charter offers an impressive array of water toys. The Williams Dieseljet tender enables exploration of secluded anchorages, while Seabobs, paddleboards, and snorkeling equipment facilitate daily adventures. Modern amenities including Starlink satellite internet and an eFoil water toy reflect the 2024 refit, ensuring connectivity and contemporary experiences alongside traditional Mediterranean exploration.

Based at Astir Marina Vouliagmeni in Greece, Flori is ideally positioned for summer and winter charters throughout Greek waters and beyond. With a cruising speed of 13 knots and maximum speed of 17 knots, she efficiently covers Mediterranean destinations while consuming approximately 300 liters per hour. A skilled crew of five ensures seamless hospitality, handling both culinary experiences and the comprehensive logistics of sophisticated yacht operations.
