## ABOUT SOLARIS

Solaris is a 29.8-metre motor yacht built by Sunseeker in 2012 at their prestigious Poole, Dorset shipyard. This well-appointed vessel represents the British builder's commitment to refined design and efficient engineering, combining proven performance with comfortable accommodation for discerning clientele seeking a refined Mediterranean and European cruising experience.

The yacht accommodates up to ten guests across five cabins, including a master suite and additional double and twin berths, making her ideally suited for family getaways or small group charters. Her beam of 6.91 metres and modest draught of 2.31 metres provide both spacious interiors and access to shallow-water anchorages throughout the Mediterranean. With a top speed of 28 knots and registered under RINA (Registro Italiano Navale) classification, Solaris delivers reliable performance and seaworthiness for extended cruises.

Solaris has earned a strong reputation in the charter market, having hosted numerous celebratory occasions, corporate functions, and special events. Her operating history demonstrates the confidence placed in her by sophisticated charterers, with seventeen years of professional management ensuring consistently high standards of guest care and operational excellence. The yacht's track record speaks to her versatility and the quality of her design—equally at home during leisurely Mediterranean passages or when serving as a refined floating venue for milestone celebrations.

A professional crew of four manages all aspects of seamanship and hospitality, allowing guests to focus entirely on relaxation and enjoyment. Whether you are planning an intimate escape, a family adventure, or a corporate retreat, Solaris charter opportunities combine the prestige of Sunseeker engineering with the accessibility and flexibility of the modern charter market. Her proven platform and established management make her an excellent choice for those seeking an authentic, well-maintained luxury yachting experience in Northern European and Mediterranean waters.
